

BIOGRAPHY

PD Dr. med Finn M. Radtke is the chief researcher and founder of the Safe Brain Initiative.

As a senior researcher, lecturer and consultant in anaesthesia and intensive care medicine, his main research focus is directed at the detection and prevention of cognitive disorders and delirium, as well as implementation of protective strategies in the daily clinical routine. A founding member of the brain health initiative, PD Dr. Radtke also serves as research lead and steering group spokesperson.

Session Title : *The Safe Brain Initiative*
