

Biography

Dr. Theo Fotis is a Principal Lecturer at the School of Health Sciences, University of Brighton, United Kingdom. As a nursing futurist he is an active researcher in the area of Digital Health. Theo was recently named to the Top 50 Healthcare IT leaders in Europe by the Healthcare Information and Management Systems Society (HIMSS Europe), the largest health IT membership organisation in the world. In 2015, he coined the term “Digital Nursing” to define a future workforce of health care innovators with the special knowledge and skills to utilise digital technologies for the patient’s benefit.

As a frequent visiting lecturer and consultant in Hong Kong and Saudi Arabia, Dr. Fotis has a strong network of global collaborators within his research field and in the computing and engineering disciplines. He is currently leading a Digital Health Living Lab, where citizens, health professionals and industry are working side by side on health innovation through co-creation.

Keynote Lecture : “Harnessing the Future, Now!”
